浙江嘉善 智能工厂

ZHEJIANG JIASHAN SMART FACTORY

特有汇集电镀、防水贴膜等工序于一体的大型
拉链辅料制造中心。

Large-scale zipper accessory center integrating electroplating & water repellent film.

华圣达于2017年将企业进行智能化扩产，成立浙江华圣达拉链科技有限公司，公司总体园区坐落于嘉善县姚庄镇，建筑面积约80,000平方米，总投资额超过8000万美元。是整合了拉链织带、成型、缝合、漂染、模具、压铸、喷涂、电镀、尼龙条装、塑钢条装、金属条装、各类码装和钮扣生产系列工序及检测为一体的大型制造中心。

In 2017, HSD expanded the production scale of its enterprise intelligently and established Zhejiang Hua Shengda Zipper Technology Co., Ltd. The company's park area is situated in Yaozhuang town, Jiashan county, covering a total area with the building occupying approximately 80,000 square meters and having a total investment of over USD 80 million. It is a large-scale manufacturing center integrating a series of processes and tests such as coil, plastic and metal zipper's tape weaving, forming, sewing, dyeing, molding, die-casting, enamel, electroplating and button production, etc.

一站式制造

ONE-STOP
MANUFACTURING

柬埔寨工厂

HSD CAMBODIA FACTORY

柬埔寨首家也是唯一的拉链制造企业。

The first and only Chinese zipper company to establish a
factory in Cambodia.

华圣达于2014年扩大产能规模，在柬埔寨建立中国第一座海外拉链工厂，柬埔寨工厂位于柬埔寨磅士卑省，距离首都金边40公里，我们更能针对区域客户的特性，提供便捷的服务，满足国际市场的需求。

Our Cambodia factory, which opened in September 2014, is located in Kampong Speu, approximately 40 kilometers from Phnom Penh, the capital of Cambodia. As the only zipper factory in Cambodia, we are able to offer our customers shorter lead times and more convenient service to meet the requirements of the international market.

是第一也是唯一

ONE & ONLY in
CAMBODIA

越南工厂

HSD BRAND NEW PRODUCTION
FACTORY - VIETNAM

坐落柬越交界的战略枢纽，物流高效便捷，
双边辅料制造无缝衔接。

Located at the strategic hub of the Cambodia-Vietnam border,
we offer efficient and convenient logistics, seamlessly
integrating bilateral accessory manufacturing.

华圣达目前已于越南进行建设规划，总投资额达 1,200万
美元。工厂占地面积约 15,000 平方米！

HSD has already completed construction planning at Vietnam Factory.
Totally Investment of 12 million USD. Park covers over 15,000 square.

绿化工程设备

Equipment of environmentally friendly

01. 太阳能设备 Solar energy equipment

投资太阳能设备，
每年可节省用电**90万**千瓦·时，
减少**89.73万**千克二氧化碳排放。

Investing in solar equipment can save **900,000kWh** of electricity annually and reduce carbon dioxide emissions by **897,300kg**.

02. 污水处理系统 Wastewater treatment system

引进国际标准的污水处理系统及回收利用系统，废水高效处理。

The introduction of international standard wastewater treatment and recycling systems enables efficient wastewater processing.

03. 环保空调 Environmental air conditioner

导入环保空调，以循环降温模式取代空调冷冻降温模式，有效达到节约能量，降低电耗。

The introduction of eco-friendly air conditioners, which use a recirculating cooling mode instead of traditional refrigeration cooling, effectively saves energy and reduces electricity consumption.

04. 废气处理系统 Waste gas treatment system

引进国际标准的废气处理系统，
废气平均去除率高达**87%**。

The introduction of international standard exhaust gas treatment systems achieves an average removal rate of **87%** for exhaust gases.

COMPANY CERTIFICATION

企业认证

实验室验证通过

Pass the certification of Adidas laboratory

华圣达先后成功通过Adidas(阿迪达斯)、ANTA(安踏)等官方实验室认证。
HSD has successfully passed the official laboratory certifications of Adidas and ANTA.

Adidas |
成人物性实验室许可, 实验室通过的证书已可于ITS官网上阅览。
Certified by the Adult Physical Properties Laboratory, and the certification can now be viewed on the ITS official website.

ANTA |
已符合具备承担安踏集团辅料检测能力。
Meets the requirements to undertake accessory testing for the ANTA Group.

先进染色设备与高品质染料

Advanced Dyeing Equipment & High-quality Dyestuff.

布带染料全厂一律使用Daystar品牌优质染料, 并搭配先进对色与数字配色系统, 至今已获得Adidas、Puma等国际大厂认可。

We only use Daystar dyes and advanced color matching system in order to meet the high standards of customers like Adidas, Puma and other international brands.

HSD 证书 Certificates:

- ISO 14001: 2015 (环境管理体系)
- ISO 9001: 2015 (质量管理体系)
- OEKO-TEX STANDARD 100 & TQP
- HIGG INDEX FEM 与 FSLM

帮助客户提升品牌价值，成就你我梦想。

PRODUCT AND SERVICE

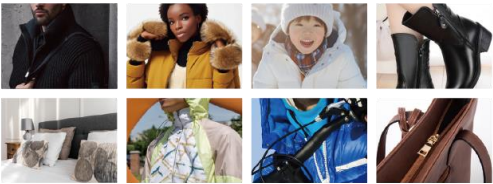

产品与服务

华圣达目前针对男装、女装、童装、运动休闲装、鞋类、手袋、家纺、车套、帐篷与箱包.....综合开发出具有潮流风格、功能性、设计感、环保为导向的产品。

Currently, HSD is focusing on the development of products in men's and women's clothing, children's clothing, sportswear, casual wear, footwear, handbags, home textiles, car covers, tents and luggage, among others. These products are designed to be trendy, functional, and environmentally friendly. HSD combines these elements to create products that prioritize fashion, functionality, design, and environmental sustainability.

我们拥有专门的研发团队，致力推动创意创新拉链设计，透过研发与创新设计来增加产品综合竞争力，并且利用新颖的商品开发来提升客户品牌无形的附加价值。

We have a dedicated R&D team committed to driving creative and innovative zipper design, increasing product competitiveness through research and innovative design, and enhancing the intangible added value of our brand through novel product development.

常规拉链

REGULAR ZIPPER

HSD

拉链的构造分为：布带、链牙、拉头三部分。

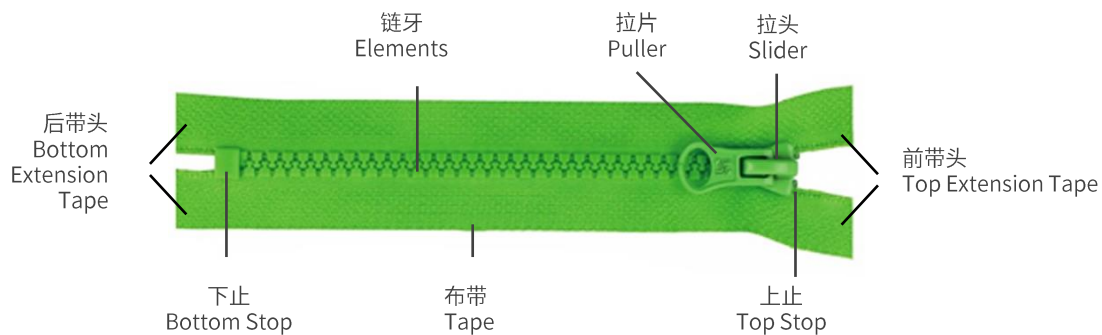

- 前后带头 拉链上没有链牙部分的布带称为带头，上止端为前带头，下止端为后带头。
- 上止 固定于牙链带上，限制牙链拉合时拉头滑出牙链的止动件。
- 拉头 使链牙啮合和拉开的运动部件。
- 拉片 拉头的一个组件，可设计成各种几何形状与拉头体连接或通过中间件与拉头体连接，实现拉链开合。
- 链牙 由金属、塑料等材料通过加工后呈现一定形状的齿牙。
- 布带 由棉纱、化纤或混合化纤织成的柔性带，用于承载链牙及其他拉链组件。
- 下止 固定于链带上，限制牙链拉开时拉头滑出牙链带，并使得两边牙链带不可完全分开的止动件。

Zippers can be divided into there major parts; the tape, the teeth and slider.

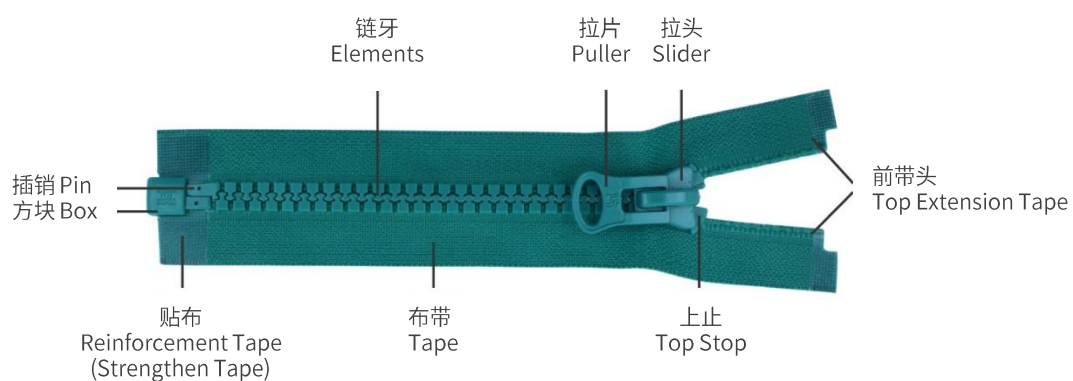

- Top & Bottom Extension Tape Top extension tape is the parts of zipper without elements. Top extension tape is the tip of top. Bottom extension tape is the tip of bottom stop.
- Top Stop A component which is fixed on top of the chain restricts sliders moving away.
- Slider It is a movable component which makes chain close and open.
- Puller It is a part of slider which can be designed in all kinds of geometry shapes and connects with slider through clammer to achieve zipper's on-off.
- Elements Elements are made of metal or plastic and have certain shapes after processing.
- Tape A soft belt, which is made of cotton yarn polyester and synthetic yarn, is used for bearing elements and other components.
- Bottom Stop A component which is fixed on the bottom of chain restricts sliders moving away.

FAQ **09**

- 变色

- Discoloration

- A. 如果金属拉链的链牙接触到羊毛或皮革，可能会氧化并变黑，这会导致织物染色。应注意尽量减少金属拉链与这些织物的直接接触。

Metal zipper elements may oxidize and turn black if they come into contact with wool or leather. This can cause staining to the fabric. Care should be taken to minimize direct contact with these fabrics.

- B. 当使用橡皮筋将拉链捆在一起时，橡皮筋下方的区域可能会使布带和链牙变色。这是由于某些橡皮筋中含有硫元素。

When zippers are bundled together using rubber bands, the area under the rubber band may discolor the zipper tapes and/or elements. This is caused by Sulphur contained in some kinds of rubber bands.

- C. 如果订购具有高抛光度的拉头和拉片，它们可能会发生氧化。为了避免这些抛光饰面的氧化与表面划伤，包装时需要用薄纸包裹。

In the case where pullers and slider have been ordered with a high polished finish, oxidization can still occur. To avoid this and to avoid surface scratches to these polished finishes, wrapping with tissue paper is absolutely necessary when packing.

- 拉头卡阻

- Slider Stuck

- A. 拉头可能会被织物衬里或相邻织物卡住。这时请不要用力拉动拉头，因为这会对织物造成损坏，并使拉头更难被拉开。应当轻轻地前后拉动拉头，同时拉出织物中被卡住的部分。

The slider may get caught up on the lining of the fabric or adjacent seems. Please do not force the slider as this will cause damage to the fabric and make it more difficult to release the slider. Move the slider back and forward gently whilst working out the part of the fabric that has become trapped.

- B. 穿衣或脱衣服时，拉链应完全拉开。

The zipper should be fully unzipped when dressing or undressing.

- 颜色和镀层迁移
- Color and Plating Migration

- A. 当拉链布带上的染料与应用于服装织物的某些化学品或处理剂发生反应时，或者当应用于服装面料的某些化学品与拉链链牙上的镀层发生反应时，会导致颜色和镀层迁移。颜色迁移在皮革和人造皮革制品上尤为明显。为了防止这种情况发生，应在物品之间使用薄层衬里进行隔离。

Migration is caused when the dye from the zipper tapes reacts with certain chemicals or treatments that have been applied to garment fabrics or when certain chemicals applied to the garment fabrics react with the plating on the zipper teeth. Color migration is particularly noticeable on leather and synthetic leather products. To prevent this, a lining of tissue paper between the articles should be applied.

- B. 拉链布带在正常情况下，已经进行了防止颜色迁移的处理。然而，当深色物品与浅色物品直接接触时，仍然可能会发生颜色迁移。这与家用洗衣机中同时洗涤深色和浅色物品时的染色现象相同。如果深色物品将会放置在浅色物品上时，请在下单时提前通知我们，反之亦然。

Zipper tapes are already treated in such a way to prevent color migration under normal conditions. However, when dark articles come in direct contact with light articles, migration might occur. It is the same phenomenon that can be observed when washing dark and light articles together in a domestic washing machine. Please notify us in advance when placing your orders if dark articles are going to be placed on light articles and vice-versa.

- C. 对于浅色服装，应沿链牙与织物接触的区域使用纸层隔离。这可以防止服装运输过程中的迁移效应。

For light-colored garments, a layer of paper should be used to isolate the area where the zipper teeth come into contact with the fabric. This can prevent migration effects during the transportation of the garments.

- 请问「过检针」是什么意思？
- What is " Needle Detector" ?

在服装生产过程中极有可能有缝针、大头针等容易对人体造成伤害的铁金属件混入，利用含有铁元素物体在通过电磁场变化的原理造出检针器，就可以方便检出服装中是否混有缝针，大头针等铁质金属件，避免伤害人体。

In the clothing production process, iron metal parts such as needles or pins may accidentally mix into the garments. By using a needle detector, which operates on the principle of detecting changes in the electromagnetic field, you can easily check if the clothing contains any needles, pins, or other iron metal parts, thereby avoiding potential harm to the human body.

- 华圣达对于客户色样一般保留多长时间？
- How long does HSD can keep the customer color samples?

我们对于客户的产品色样，平均保留时间为6个月，6个月之后依旧会按照色样，对客户请求给予续做的根据，若有部分色样需要特殊保留，请预先于6个月期限到之前向相关服务人员联系。

We retain the customer's product color samples for approximately 6 months. After this period, we will continue to store the color samples based on customer requirements. For color samples that need special reservations, please contact our service personnel at least 6 months in advance.

若您有更多疑问，欢迎联系华圣达客服信箱 server@hsdzipper.com

我们将竭诚为您解答，谢谢。

If you have more questions, please contact HSD customer service mailbox : server@hsdzipper.com
We will answer for you wholeheartedly, thank you.

扬中 **华** 之名, 承 **圣** 智之谋, **达** 未来之境。

以华夏之智慧, 汇众生之魂, 开启新的篇章; 以圣智之素养, 聚传统之源, 彰显不凡气质; 以达远之目标, 行精实之路, 书写辉煌历史。

华圣达拉链 (HSD) 为中国著名辅料品牌, 拥有一体化大型制造中心, 专业提供拉链、钮扣及其他配件的一站式服务, 现为中国五金协会拉链分会理事长单位。

HSD 不仅是中国拉链行业标准起草单位之一, 更是继YKK后首家通过国际Bluesign蓝标认证的拉链企业 (全球最严格的纺织品环保标准之一)。

我们致力于环保与永续发展, 秉持精细、先进、友善的智能制造理念, 践行全球可持续化发展的使命, 积极为业界树立典范。

HuaShengDa Zipper (HSD) is a renowned accessory brand in China, with an integrated large-scale manufacturing center specializing in providing one-stop services for zippers, buttons, and other accessories. It currently serves as the chairman unit of the Zipper Branch of the China Hardware Association.

HSD is not only one of the drafting units for industry standards in the zipper sector but also the first zipper company to achieve international Bluesign certification, one of the most stringent environmental standards for textiles, following YKK.

We are dedicated to environmental protection and sustainable development, adhering to the principles of meticulous, advanced, and friendly intelligent manufacturing. We fulfill the mission of global sustainable development and actively set an example for the industry.
